Scenario:(Strategic product placement analysis)
A retail company wants to analyze product placement to improve sales performance

	Entice	Enter	Engage	Exit	Extend
	How does someone become aware of this service?	What do people experience as they begin the process?	In the core moments in the process, what happens?	What do people typically experience as the process finishes?	What happens after the experience is over?
Experience steps What does the person (or people) at the center of this scenario typically experience in each step?	Recognize the need for data-driven insights on product placement and sales Explore Tableau solutions for visual data analytics and dashboard	Download required dataset from kaggle Import CSV file into Tableau and understand the data structure	Clean and prepare the dataset Create worksheets and build visualizations Analyze key metrics and identify insights	Build interactive dashboard and review findings Share dashboard with stakeholders for decisions	Monitor performance using dashboard regularly Update data and refine analysis as needed
Interactions What interactions do they have at each step along the way? - **People:** Who do they see or talk to? - **Places:** Where are they? - **Things:** What digital touchpoints or physical objects do they use?	Business Analyst, Managers, IT Support, Data Team Company, Tableau website, Meetings Sales reports, Spreadsheets, Tableau	Data Analyst analyzes the data from CSV file Kaggle Website, Tableau Desktop	Data Analyst Tableau Visualizations Filters, Calculated fields Charts, Parameters KPI's, Tooltips	Business Analyst, Tableau dashboard, Dashboard filters, KPI's Stakeholders, Meetings, presentations, Reports, Dashboards, Insights	Data Analyst, Managers, Tableau dashboard, Updated Data, Refresh, KPI's Decision Makers, Business reviews, Reports, Alerts, Trends
Goals & motivations At each step, what is a person's primary goal or motivation? ("Help me..." or "Help me avoid...")	Understand how product placement affects sales Find the right tool to analyze the retail data easily	Get a reliable retail dataset for analysis Connect and explore dataset in tableau	Prepare accurate data for analysis Visualize data to identify patterns and trends Discover key insights and opportunities	View all key insights in a single dashboard Share findings to support business decisions	Monitor sales performance over time Improve strategies with updated insights
Positive moments What steps does a typical person find enjoyable, productive, fun, motivating, delightful, or exciting?	Excited to use tableau for powerful data visualization Motivated to find insights that can help in increasing sales	Easy access to kaggle dataset Data imported successfully in tableau	Data is clean and organized Visualizations are clear and easy to understand Discovering valuable insights and trends is rewarding	Dashboard looks professional and interactive Stakeholders appreciate insights and visual reports	Dashboard helps in tracking performance effectively Insights lead to better product placement and sales
Negative moments What steps does a typical person find frustrating, confusing, angering, costly, or time-consuming?	Not sure how to start analysis or which data to use Too much data and information can be overwhelming	Dataset may have missing or inconsistent values Datatype or format issues during import	Data cleaning takes more time and effort Choosing the right chart or metric can be confusing Getting inaccurate insights with wrong or incomplete data	Dashboard design may become cluttered Explaining insights clearly to all stakeholders	Data not updated regularly affects analysis Changing business needs require rework and updates
Areas of opportunity How might we make each step better? What ideas do we have? What have others suggested?	Create awareness about tableau benefits and training Provide templates and success stories for inspiration	Validate and clean dataset before import Ensure correct datatypes and relationships	Use calculated fields and filters effectively Use appropriate chart types for each analysis Implement data quality checks regularly	Design clean, user-friendly and interactive dashboard Focus on key KPIs and actionable insights	Schedule regular data refresh and dashboard updates Monitor KPIs and adjust strategies continuously
